

COOL TOWNS LIST OF SITE CHARACTERISTICS

A uniform list of site characteristics is filled to analyse spatial differences that may affect the level of heat stress of different urban spaces. To supplement this list, overview photographs should be taken with a regular camera. Please note their filename at the bottom of this form.

Complete the form with a number, text or tick in empty boxes as appropriate.

General information

Name of pilot site (when applicable)

Address (street/ postcode/ town)

Date (yyyy/ mm/ dd)

Documents included (tick all that apply) Town plan with site marked
